## ABOUT THE COURSE

- Full Mouth Rehabilitation is a highly individualized treatment .It involves a well-orchestrated sequence of procedures , which could be a nightmare when not executed right.
- This course will impart skill and technical knowledge of the stomatognathic system and materials to revamp a patient dentition.
- FMR course is intended for clinicians who want to learn this seemingly complicated treatment in a more simple manner to get predictable results and eliminate all the hesitation and apprehension of VDO, Facebows, CR and Occlusion.

## Schedule:

**16th Feb 2018**

**Morning : Lectures**

**Evening: Demonstration and hand-on for fabrication of anterior deprogramming appliance.**
